## About us

Research Tag is part of Enformation group, a group of companies with over 25 years of experience in publishing and providing customised services to the Romanian research community.

Enformation offers consulting and support services for over 80 research and higher education institutions and represents the most important publishers worldwide in Romania. We also partner with representatives of the academic community throughout the publishing process, offering dedicated services to authors seeking to publish their manuscripts with top publishers, as well as to publishers aiming to enhance the quality of the academic content they distribute.

With decades of experience and expertise, Enformation launched the Research Tag platform, bringing together consulting and representation services for academic journals.

# Why partner with us?

- Vast experience in publishing production: Editing tools, plagiarism detection, integrated peer review process, production systems, DOI numbers registration, citation exporting tool, printing, and more.
- We innovate constantly - We develop our own products to support the academic community (e.g., Integrity, in-house copy-editing solutions, etc.) and collaborate with leading international developers (e.g., Turnitin, Enago).
- We have a vast network for disseminating academic content, along with our own dedicated promotion channels.
- For more than 25 years, we have been collaborating with leaders in academic publishing and scientific content evaluation.

# Available Access Model

## Open Access and Article Processing Charge (APC) models

APCs play a crucial role in academic publishing by allowing researchers to openly share their findings. By partnering with us, we will help you find and implement the most effective APC solution for your journal, investigating opportunities for discounts and waivers so that authors can publish their work without incurring significant financial burdens

## Publishing Services for Journals

Research Tag is the most accessible solution for journals that are gaining visibility and seek to expand their international reach. We prioritise the broad disseminating of research findings with an impact on society, proving our partner journals with the best tools to achieve this goal. Our team also ensures that the proposed solutions are tailored to each journal's profile and specific needs. The academic maturity of a journal is crucial, which is why we encourage every editorial team that reaches out to us to work closely with our specialists, from developing a medium- and long-term development strategy to implementing the production process.

Our journal-focused services are available in two main packages, designed to meet a wide range of needs from essential support for emerging titles to advanced solutions for established journals. Depending on the specific requirements of each journal, we also offer the flexibility to combine services in a tailored package.
